Introducing 0.50 HSL Connector Portfolio

TE Connectivity's (TE) 0.50 HSL (High Speed Link) connector is designed for high speed data transmission and to meet automotive requirements. An ultra-compact 0.50mm terminal, that currently is the smallest in the automotive industry, has been adapted to this 0.50 HSL for allowing lighter and smaller connector design.

The 0.50 HSL system supports data rates up to 1 Gbit/s and more. It is EMI optimized to prevent malfunction of increasing numbers of infotainment applications within the vehicle.
